

# Theodotos Neokleous

Ambitious, hard-working individual with technical knowledge and team collaboration skills. Ready to deploy.

## Work experience

**Association Member** Mar 2025 - Present

*Maasec, Maastricht*

Team Member of Maasec Association in University of Maastricht. Through the association i participated in:

1. Hackathons, honing and sharpening my coding skills with real world problems
2. CTF competitions, focusing on web, pwn and reverse engineering problems
3. Penetration testing Events, hands-on experience in penetration testing alongside other students, phd researchers, professors and professionals.

**IoT devices support - Software Developer - Sales Representative** Jul 2023 - Aug 2024

*1210Media, Nicosia*

Part of a startup team, had to take multiple positions to fill in space for a limited budget. My roles consisted of:

1. Sales - cold calling, cold emailing, arranging meetings, scheduling events
2. Software Developer - created a web scraper script to scan for all event websites and find most relevant tech events. Target was to automate processes and focus sales by saving time. - created an automation emailing script that sends targeted emails by using as input personal details of the individual that you want to target - created automation script for scheduling social media posts based on view analytics from social media platforms as well as rating them to improve the digital presence of the company - continuous updating these projects based on results and feedback
3. IT support IoT devices - the product we were selling uses IoT devices, I was in charge of all the technical setup and malfunction troubleshooting
